

# Abdulrahman NABIL SHEHATA

Student at faculty of Computer Science  
and Information Technology

## About me

I'm focused on backend development with Python, cloud computing, and DevOps tools and practices. I've learned the fundamentals of cloud infrastructure and backend systems.

I'm always working to improve my practical skills through hands-on training and real projects.

My goal is to build a strong career in DevOps, deliver efficient solutions, and grow through continuous learning and real-world experience.

## Education

### Ahram Canadian University

Student at faculty of Computer Science  
and Information Technology

**Expected Graduation:** 2027

## Skills

- Backend development with Python
- Object-Oriented Programming (OOP)
- Cloud computing fundamentals (Huawei Cloud)
- Git and GitHub version control
- Linux and operating system troubleshooting
- Debugging and problem-solving
